

ROHI GREEN - Polyurea Protective Coating

Introduction

Rohi Green International is a group of companies and is diversified into various industries by bringing environmentally friendly products and systems to the reach of every individual and organization.

Rohi Green International Electromechanical LLC offers various protective coating solutions to various industry requirements viz truck bed linings, utility vehicles, boat linings, deck water proofing, cargo holds, warehouses, horse trailers, industrial flooring, containment areas. Protective coatings serve a valuable purpose and the return of investment (ROI) is considerable when they are applied successfully as they can prolong the life of the material immensely.

Rohi Green is currently in air purification systems and its global footprint is in India, Finland and U.A.E. It is a diversified company established in 2009 with its Head Office in State of Goa, India. It is an environment friendly company as the very name suggests. Our vision is to provide a set of revolutionary solutions with an initiative to avant-garde technologies by embarking on AiroCide - a Photocatalytic Air Purifying System and now into a field of Protective coating that is environmentally applicable to most of the business segments.

Rohi Green is committed to serve the needs of the demanding, innovative and ever growing quality conscious industry. It's competitive edge is that it is equipped with the right top of the range equipments and has the experience and knowledge to meet the demands of our customers as per their expectations and requirement. It is associated with quality and reliability backed by technical knowhow and expertise.

Rohi Green has a well trained and experienced team in the application of protective coating industry keeping in mind the safety aspects and the safeguarding of the environment. The success of the business is due to the efforts, ownership and commitment displayed and instilled in the team with uncompromising devotion to live up to the quality standards. Rohi's belief is in maintaining and providing the product to the full satisfaction of our customers.

ARMORED VEHICLES

The escalation in the war against terror has seen POLYUREA take an active role in the protection of military personnel and equipment in trouble spots around the world. Internationally defense forces rely on the superior strength of polyurea to protect their soldiers and their equipment.

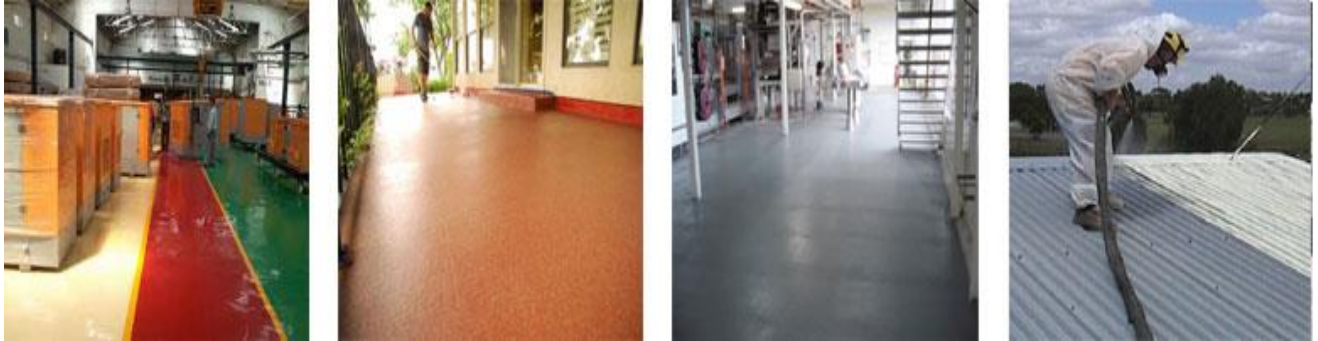

POLYUREA provides superior solutions against abrasion, corrosion, impact and blast mitigation and are used to enhance composite armour products.

Of course POLYUREA doesn't only supply cutting edge technology linings to the defense forces but also supplies superior solutions to more general applications such as corrosion and abrasion protection of vehicles, secondary containment solutions for fuel depots, waterproofing and flooring solutions.

SERVICES

Rohi Green's qualified and experience team offers customized solutions meeting the expectations of industry standards and customer's needs. Protective coatings are applicable in most of the industries, it is said that a "stitch in time saves nine". Protective coating is the solution to save unforeseen expenditure and maintain product and service quality. In extreme humid climatic conditions such as the Middle East, protective coating offers the most viable solutions to safeguard assets of individuals and organizations.

- Automobile
- Industrial floorings
- Construction
- Schools and Institutions
- Temp Coat Solutions
- Residential
-

AUTOMOBILES

Whilst every individual/organization ensures vehicles are serviced in time to restore longevity of the vehicles often the body of the vehicle is ignored and exposed to harsh environment and constant use resulting in deterioration of the vehicle beds. Protective coatings offer solutions for protection and sustainability of the vehicle body.

- Truck Bed lining
- Utility Pick-ups
- Refrigerated vans and trucks

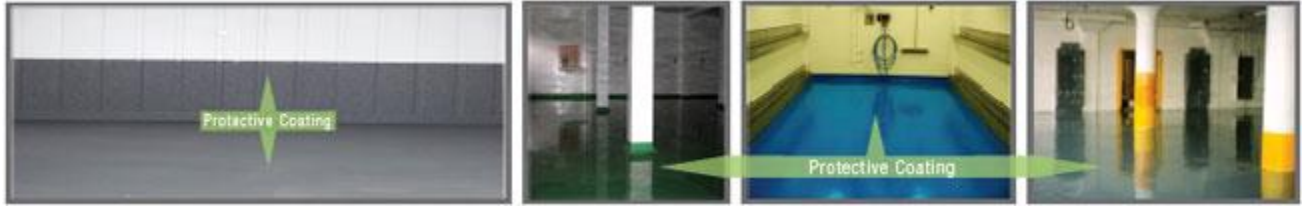

Every Health and Municipality likes to ensure that the refrigerated trucks are HACCP (Hazard analysis and critical control points) and hygiene compliant. Hence protective coating is the solution to the above needs.

INDUSTRIAL FLOORINGS

Industrial protective coating is a solution to protect infrastructure, fabrication, or component from exposure to situations that will ultimately lead to erosion and degradation.

- Warehouses
- Kitchens
- Manufacturing industries
- Car parking

COMMERCIAL FLOORING / COLD STORAGE FLOORING / KITCHEN FLOORING.

Conventionally floors are made of ceramic tiles giving it a nicer look that are vulnerable to slipping and skidding leading to potential body injury. Protective coating solutions provides anti-skid, chemical resistance, durability and ease of cleaning resulting in a safer and eco-friendly environment.

- Showroom decorative flooring with different coatings
- Sports arena - Basketball, Tennis, volley ball
- Indoor sports arena

MARINE, OIL INDUSTRY AND OFFSHORE SERVICES

Rohi Green specialty also includes applying flooring services for industrial work areas like canteens, toilets, reception areas, exterior paving and decks. Our services are excellent for boats interior and exterior protection as well.

- Rigs - Jackets and Platforms
- Pipes
- Boats
- Tugs
- Barges
- Ship liners

- Construction

Farming, Horse stable and Dairy industry

To meet hygiene standards in areas such as cowsheds, horse stables, camel sheds, milking parlours, etc., our solution provides a range of high performance protective coatings for the surface which is food safe, hygienic, antiskid, chemical resistant, and anti-bacterial.

All equipment and machinery come in constant contact with sand, gravel and mud which exposes them to corrosion and deterioration. Our protective coating solutions can help in restoring longevity of your assets and return on investments (ROI). It also extends the life of an asset by slowing the process of wear and tear.

- Bulldozers
- earthmoving equipments, etc.,

- **SCHOOLS AND INSTITUTIONS**

We provide solution which achieves a high performance decorative, protective, waterproofing surface coatings that gives cost effectiveness, safety and functionality required for your school or institutions. Along with providing durable and easy to clean surfaces we can help improve safety standards by providing anti-skid around pool areas, basketball, volleyball courts and exterior paving.
